

Angelo Maria Sabatini

Table of contents

I am associate professor at the BioRobotics Institute, Scuola Superiore Sant'Anna, Pisa, Italy. In my posts, I attempt to explain various concepts that I have learned while studying, teaching and doing research.

My research is about the development of algorithms for wearable inertial-sensor-based systems to be used for motion analysis applied to the assessment of human performance. Recently, I started studying the theory of diffusive processes in the light of applications to the modeling of time series of human motion.

For a record of my publications, please visit [this site](#). Feel free to reach out to me via [mail](#).
